

Smart Thermostat (ADC-T25)

Affordable, Intuitive, and Easy to Install

The Smart Thermostat (ADC-T25) offers seamless temperature control with a modern, user-friendly design—all at an affordable price point.

Key Features

Affordable & Reliable

Built on the proven track record of its predecessor, the ADC-T2000, the T25 works with most HVAC systems and delivers the best of smart home tech at an entry-level price point.

Easy Installation

Easy to use terminals and auto-configuring wiring allow for a quick, secure setup. Plus, long battery life eliminates the need for a common "C-Wire."

Enhanced User Experience

Essential functions are displayed directly on screen for straightforward operation. Digital temperature and humidity sensing provides more accurate and sensitive readings.

Branding Opportunity

Optional customizable brand tags keep your brand front and center every time customers use the thermostat.

Visit the [Alarm.com Partner Portal](#) to purchase the Smart Thermostat (ADC-T25) and access marketing, installation, and support resources.
