

New Product Announcement

PowerG + Black and Brown Vanishing Contacts

Date:	Wednesday, March 18, 2026
Region:	United States
Product:	PowerG + Black and Brown Vanishing Contacts
Brand:	DSC

Overview

We are pleased to announce the launch of the PowerG + Black and Brown Vanishing Contacts. The PowerG + Black and Brown Vanishing Contacts incorporate the next generation of PowerG and also include many enhancements to the device itself, including over the air (OTA) upgrades, battery level reporting, and a brand new look and feel. We anticipate that these will begin shipping in April.

Features and Benefits

Feature	Benefit
Battery Level Reporting*	Batteries now report their current battery level to the panel where technicians can view the current voltage in the Advanced Settings menu.
Device OTA*	Devices support over the air upgrades.
Dealer Lockable Sensors*	Dealers have the option to lock down sensors to their dealer ID, preventing them from being taken over.
Two-factor Authentication Enrollment*	When enabled, this is an added layer of security where the device follows two factor authentication, requiring the technician to enter the device PIN code on the panel to complete enrollment.

Battery Pull Tab	Once the pull tab is removed, the device enters pairing mode, saving valuable time during the install.
Modern Look and Feel	The look and feel is more modern and more visually appealing. The device comes in a white matte finish.
Full Length Magnet	A full-length magnet enhances reliability by providing a stronger and more consistent magnetic field, significantly reducing the likelihood of false alarms. Additionally, it offers better alignment tolerance and greater flexibility in placement during installation.

*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as a PowerG Vanishing Contact.

Part Number	Description	Carton Quantity
PGP9303BK	DSC PG + Black D/W Vanishing Contact	48
PGP9303BR	DSC PG + Brown D/W Vanishing Contact	48

Compatibility

- IQ5 Panel*
- IQ5 NS*
- IQ5 Hub*
- IQ4 Panel*
- IQ4 NS*
- IQ4 Hub*
- IQ2+ Panel
- IQ Pro
- IQ Hub
- PowerMaster
- PowerSeries NEO
- PowerSeries Pro

*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as a PowerG Vanishing Contact.

Approvals and certifications

- **FCC (912 to 919 MHz):** 47CFR part 15
- **ISED (912 to 919 MHz):** RSS-247
- **UL/ULC:** UL 634, ULC C634

Known Limitations

- PowerG + features will not be available on devices enrolled on panels that do not support PowerG + or on panels that are not on a PowerG + supported version. These devices will enroll in legacy (fallback) mode as a PG Vanishing Contact.
