

New Product Announcement

PowerG + Devices

Date:	Friday, July 11, 2025
Region:	North America
Product:	PGP9303, PGP9914, PGP9920 PGP9922, PGP9945E
Brand:	DSC

Overview

We are pleased to announce the launch of five new PowerG + devices. Each device incorporates the next generation of PowerG and includes many enhancements to the devices themselves, including over the air (OTA) upgrades, battery level reporting, and brand new look and feel.

- PowerG + Door/Window Vanishing Contact: PGP9303
- PowerG + PIR Motion Detector: PGP9914
- PowerG + Glass Break Detector: PGP9922
- PowerG + Wireless Repeater: PGP9920
- PowerG + Door & Window Contact with Auxiliary Input: PGP9945E

Features and Benefits

Feature	Benefit
Device OTA*	Devices support over the air upgrades.
Dealer Lockable Sensors*	Dealers have the option to lock down sensors to their dealer ID, preventing them from being taken over.
Two-factor Authentication Enrollment*	When enabled, this is an added layer of security where the device follows two factor authentication, requiring the technician to enter the device PIN code on the panel to complete enrollment.
48-Hour Backup Battery	If the device loses power, the battery backup will ensure the repeater functions for 48 hours until power is restored.
Modern Look and Feel	The look and feel is more modern and more visually appealing. The device comes in a white matte finish.

*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as standard PowerG devices.

Compatibility

- IQ4 Panel*
- IQ4 NS*
- IQ4 Hub*
- IQ2 Panel
- IQ Pro
- IQ Hub
- PowerMaster
- PowerSeries

*Only PowerG + enabled panels support the new PowerG + features. Devices enrolled on panels that are not PowerG + enabled will enroll in legacy (fallback) mode as standard PowerG devices.

Approvals and certifications

- **FCC (912 to 919 MHz):** 47CFR part 15.247
- **ISED (912 to 919 MHz):** RSS-247
- **UL/ULC:** UL 2610, UL 1637, UL 1023, UL 985, ULC-S545, ULC-S304

Known Limitations

- PowerG + features will not be available on devices enrolled on panels that do not support PowerG + or on panels that are not on a PowerG + supported version. These devices will enroll in legacy (fallback) mode as standard PowerG devices.
